

Lubricants that  
boost your  
productivity

# A new rhythm of production.

High-performance  
lubricants for high-speed  
canmaking and closures.

[interlub.com](http://interlub.com)

**RESHAPING  
THE INDUSTRY.**

## What happens when lubrication is no longer the weak link.

Enhance  
production to

**20%**

Reduce the  
scrap rate to

**10%**

Increase  
your OEE  
up to

**20%**

Improve lubricant  
consumption  
up to

**30%**

### Other benefits:

- Improve the efficiency of your daily production
- Decrease your energy consumption
- Expend less on spare parts

# Reshape your process.

Our innovative approach to high-performance lubrication guarantees a better quality, protection and consistency in every line of production. This is strategic lubrication.

## SHELL SYSTEM

### Uncoiler Mechanical System

Liplex HP

### Hydraulic Positioning System

Gear Synt

### Cutting and Forming Lubrication

Interoil AI / Stamp Fluid

### Uncoiler Mechanical System

Liplex HP

### Positioning System

Gear Synt

## CUPPING SYSTEM

### Drive & Rotating Support System

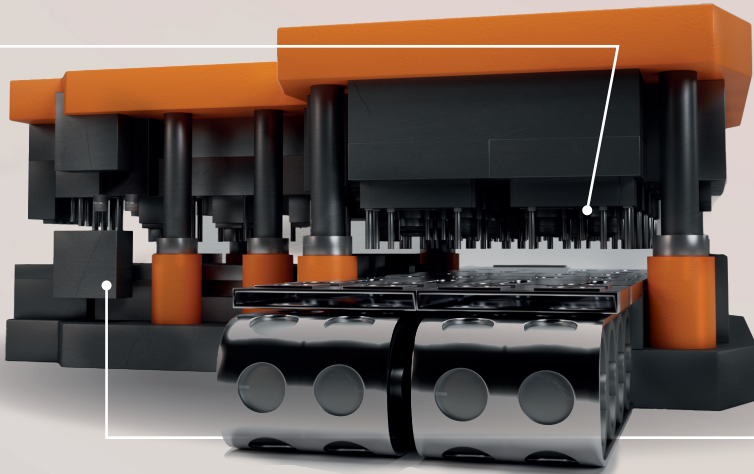

Liplex HP / Liplex Synt

### Hydraulic & Clutch System

Gear Synt

### Main Lubrication System

Gear ETZ

## EOE CONVERSION SYSTEM

## DECO PIN OVEN

**High-Temperature  
Chain Conveyor**

Cad Food HT / Cad Tex HT / Star 1000 S

**Oven Bearing  
& Support System**

Interplex

**RESHAPING  
THE INDUSTRY.**

Strategic lubrication:

## A new era of achieving your production goals.

**Running fast is easy.  
Running fast and in control is the real challenge.**

Friction, metal flow and surface interaction behave differently when you're running flat out.

What works at moderate speed breaks down when the line is wide open. That's where most lubrication strategies lose control.

We design lubrication technology that keeps your line dialed in, even when you're pushing it to the limit.

### **Innocuity guaranteed.**

Ensure the safety of your production with high-performance lubricants that comply with the regulatory guidelines of organisms like NSF International.

We offer lubricants with both NSF registration and FSSC 22000 certification that deliver industry food-grade performance.

# This is not lubrication as usual.

This is **strategic  
lubrication**  
for metal packaging.

At Interlub, we design products based on a deep understanding of your specific process and needs, treating every challenge as an opportunity to defy the ordinary limits of the industry.

When lubrication is aligned with the process, the entire line finds a new rhythm. We are here to help you make it happen.
